

Guided lakefishing trips with professional fishingguide - what to know?

- Fishing guide has over 20-years of experience of fishing and works as a **full time professional fishing guide** during the summer time in the whole region of Tervo-Kuopio-Varkaus-Tahko (Nilsjä) area.
- The boat, motors, fishing equipment, sonars & gears are new (2016) and boat is inspected as a rental boat. (includes life ring, torch, emergency pack etc..)
- Safety comes first in my trips! So I provide lifejackets. Also safety plan and emergency courses have been done by the captain. A valid certificate to drive a rental boat also exists.

How about fishing?

When fishing in the lake with customers, the main goal is of course to catch fish. This is easy because I use the latest sonar technology and also I know the best places to fish. The equipments are **new** and boat is always **clean** for the next groups to come in. **The fishing gears are always provided by the fishing guide!**

Personally, I want that customer learns new fishing techniques and how to fish in Finland after the trip. Memories are usually caught with a camera to remember long after the trip and these pictures are free to use if taken. Guide can send them example by e-mail given by the customer.

- Caught fish catch are served under ice during the day and quality is perfect for making food afterwards. Fish can be made to fillets after the trip!
- **Boat is always included: fishing guide, fishing gears, life jackets, boat rental, used petrol, insurance** (always customer should have besides a travel insurance of course.)
- Usually it is very certain, we catch fish despite the weather. I am making everything that we are having nice moments in the waters in my guided trips.

We can have a break while eating lunch in island if wanted. I want that you feel yourself comfortable also in my trips! Rain jackets and gears can be asked separately if needed before the trip.

For **Pike**, jigging with softbaits or casting bigger baits near the shore is most effective.

For **Pike, Perch** and **Zander** or “**pike perch**” the jigging style is the most effective. Every customer is having their own set and I **always** provide everything needed in the fishing trip. Payment are taken always beforehand.

Fishing time: 3-8 hours or many short trips / day! Ask and book customized trip just for you, your company or example family. The trips are suitable also for kids, being 6-16- years of age.
